PROFILE

Fresh graduate of Telkom University Information Technology Study Program with a strong interest in Website Development, UI/UX Design, and the Internet of Things (IoT). Experienced in building web-based applications using Wordpress Elementor, ReactJS, VueJS, NextJS, Laravel, and ExpressJS through academic projects and internships. Passionate about building user-centric digital solutions and continuously exploring new technologies to solve real-world problems through innovation and collaboration.

EDUCATION

Telkom University

Aug 2022 - May 2026

Bachelor's Degree in Information Technology - GPA 3.65

Interest : Website Development | UI/UX Design | Internet of Things

PROJECTS

Redesign of SITU TAK Telkom University Website with Figma

May 2024

Implementing UI/UX design enhancements to meet the requirements of the major assignment for the Human-Computer Interaction course, using the Situ TAK website as a reference. A timeline feature has been added so users can track the TAK validation process in the form of a monthly calendar.

Mobile App - EMONIC

Apr 2025

Developing a mobile application that functions as a daily electricity recording tool. This application helps users efficiently monitor, record, and manage daily electricity usage using Flutter, integrated with Firebase for authentication and Cloud Firestore as the primary database.

A Low-Cost Virtual pH Sensor for IoT-Based Hydroponics System

Jun 2025

Developing a low-cost virtual pH sensor for IoT-Based Hydroponics using regression machine learning algorithms such as KNN, XGBoost, and Decision Tree to predict pH values based on TDS and temperature data collected by IoT devices.

Development of an IoT and Website-Based Attendance System

Sep 2025

Developing an IoT-based attendance system and website designed using ESP32, RFID RC522, LCD I2C, buzzer as hardware media in collecting school student data which will later be managed on a web dashboard using ReactJS as the frontend, ExpressJS as the backend, and firebase as the database. In this system, the admin can monitor and set the attendance time, and can make adjustments to sick or excused students manually and then download the csv as a recap report material.

Development of the West Java Library and Archives Service Book Endowment Website

Sep 2025

Developing a book waqf website system called WAJIT which aims to provide a digital platform that makes for the public to participate in book waqf more easily, organized, and accountably by involving 3 main roles: users, admins, and super admins. Features provided by this system include a unique ID for each waqf transaction and book request, a transaction history that can be accessed and downloaded, a constantly updated book showcase, and a digital certificate that supports the transparency of the book waqf process. In this project, my contributions included frontend website admin development, feature implementation, and design slicing using NextJS.

ORGANIZATIONAL EXPERIENCES

Keluarga Mahasiswa Hindu Universitas Telkom

Mar 2024 - Des 2025

Vice Chairman I

Responsible for planning and scheduling all divisions quarterly, in accordance with campus policies. I also assist division heads and other members when they encounter onfusion or deficiencies in designing their work programs. Achievements include receiving an invitation to the 2025 State Owned Enterprise Dharma Santi Awards and providing scholarships to Hindu students at Telkom University.

Himpunan Mahasiswa Teknologi Informasi Universitas Telkom

May 2025 - Des 2025

Head of External Department

Responsible to coordinated the Public Relations and Media divisions by maintaining workflows and supporting members in program execution. Contributed to successful initiatives, including a village data privacy campaign, a comparative study with HIMASKOM UNDIP, media partnerships, corporate visits, consistent content delivery, and the “Best Brightest Content Creator Q3 2025” award.

IoT Laboratory Telkom University

May 2025 - Jun 2026

NodeMCU Laboratory Assistant

Responsible to teaching embedded systems, hardware integration, and IoT protocols while mentoring 42 students in practical sessions and also contributed to developing an IoT based hydroponic system using TDS, temperature, and pH sensors integrated with the eHydroTel app to support the "AyoBeraksi" food security program at SDN Sukarasari 5, Tangerang.

WORK EXPERIENCES

HUMIC Engineering Research Center - Telkom University

Feb 2025 - May 2025

Multimedia Designer & UI Design (Internship)

Responsible for creating UI designs for the multimedia division, including mockups, design layouts for the 2025 ICoDSA International conference activities and responsible for ensuring that all aspects of the design created are in line with the theme of the event.

SATUVISION - Bali

Jun 2025 - Aug 2025

Web Developer (Internship)

Entrusted with wordpress elementor Development, contributing to support UI implementation and website quality assurance. Successfully delivered 3 WordPress elementor projects, and performed comprehensive QA on 6 websites to ensure reliable functionality and client satisfaction.

AWARDS

- Certificate of Appreciation for Presenters of “The 3rd International Conference on Software Engineering and Information Technology (ICoSEIT 2025)”
- The 2024 Student Creativity Program (PKM) Innovation Idea passed the university level
- Certificate of Achievement - Core Initiative Frontend Project Based Internship Program as Excellent Student (Score 87.42)

SKILLS

Technical Skills

- Able to use Figma to create UI website or mobile application
- Able to use frontend frameworks (ReactJS, VueJS, NextJS) and backend (ExpressJS)
- Able to use laravel, golang, C++ and flutter
- Able to manage relational databases (MySQL, PostgreSQL) and NoSQL (Firebase)

Personal Skills

- Experienced in cross-functional collaboration
- Effective communication skills
- Commitment and responsibility
- Effective time management skills
- English Proficiency (Score: 507)
